To Olivia Stewman <ostewman@townoflakelure.com>

Olivia:

Good. Hope and I are looking forward to making the beach look more presentable. Just let me know when you have your soil samples in hand and a decision made for us to proceed with our vendor.

Also, Dana answered my email to her, Dean Lindsey, and you, saying that her department would be glad to have the lake caution buoys that I offered. I await her call, and once received will assist in helping Town staff pick up the buoys.

Thank you for your dedication to our Town,
George

Hi Mr. Wittmer,

First, I would like to thank you for your willingness to help the community and for your generosity. We would be very grateful to have you restore the beach as offered. I do want to have some soil samples taken from that area prior to any replenishment. I am working on getting this completed now. As soon as I am able to identify a timeline for testing I will provide you with an update and we can work together on establishing a time for the vendor of your choice to work on the restoration.

Thank you, again!

Olivia Stewman, MPA

Subject: Town beach restoration request . . .

Olivia

The municipal beach at Lake Lure was badly washed by receding high water during Helene and is now in need of restoration, even if not being operated during the Winter and not opened for swimming during our 2025 season (fingers crossed for sooner opening, of course).

In order to show the beach at Town Center as repaired, valued, and attractive, Hope and I would like to contribute to our Town's general restoration by our privately hiring and paying the grading company that restored the beach a year ago (per below) to do the same now, before the new year, in order for the beach to look alive and well kept.

If the Wittmers doing so is acceptable, may we have a “go ahead” from Town Manager to put the beach back to an attractive feature of our Town?

Thanks,
George
