Hi Mr. Wittmer,

I was unaware that a crosswalk stanchion was relocated today. I certainly did not authorize this. I appreciate you letting me know.

Thank you!

Olivia:

Thanks for your update. You may always depend upon our assistance to the Town, as we have been glad to practice since 2004. Once the beach samples are in hand, do please let me know of results. We are standing by for that go-ahead for restoring the Town beach to attractiveness.

In a separate vein, we are, along with others, very disappointed to see that yet another legitimate crosswalk at Town Center (between beachside rooms of Lake Lure Inn and the beach waterpark entrance) no longer has its "Stop For Pedestrians In Crosswalk" stanchion. Rather, that stanchion is now located at a non-crosswalk highway centerline at 2654 Memorial Highway. Frankly, I am more than disappointed that this legitimate crosswalk stanchion was placed where it is today.

George

Hi Mr. Wittmer,

First, I would like to express my appreciation for your continued assistance to the Town. I am still waiting on soil samples, but results should be available within the next week or two and hopefully sooner. As long as there are no issues with the sampling results, you may proceed at your convenience.

I will keep you updated.

Thank you!

Olivia Stewman

Olivia:

Good morning. Thank you for your assistance in relocating the crossing stanchion back to our Town Center east crosswalk. A good safety measure and beneficial to local and visiting pedestrians.

Have you received Lake Lure Beach soil / sand test results? If so, do advise timing as to when we may proceed with the beach restoration work.

Thanks,
George
